***Detailed Action***

***Response to Amendment***

1. Applicant's Remarks/Arguments filed on 11/13/2007 regarding claims 9-31 have been fully considered. Claims 1-8 have been canceled by applicant.
  
2. Acknowledgement is made of the terminal disclaimer submitted on 11/13/2007 with respect to the non-statutory obviousness-type double patenting rejection set forth in the previous Office action. The terminal disclaimer has been approved and the double patenting rejection is now withdrawn.

***EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE***

3. The following is an examiner's statement of reasons for allowance:  
The present application relates to providing an integrated circuit synchronous read channel for receiving digitized read signals representing digitized samples of a read signal of a magnetic storage device and recovering digital data represented, the integrated circuit comprising:

"delay circuitry that operates to delay the coupling of the digitized read signals to the digital peak detector or the timing recovery circuitry to match the delay of the coupling of the digitized read signals to the timing recovery circuitry or the digital peak detector, respectively, imposed by the digital pulse shaping filter circuitry."

The closest prior art, Patel et al. (USP 4,945,538), discloses a signal processing channel that comprises a RLL decoder for recovering coded binary data from the read RLL code signal, a phased-locked loop timing recovery circuit, a peak detection function for detecting the crowding of the write transitions on media. However, Patel fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
